Alexander Dakhno| Software Engineer (Web & APIs)

Location: Remote (CET / US EST overlap) | Email: career@lattelix.com | LinkedIn: linkedin.com/in/lattelix
GitHub: github.com/lattelix | LeetCode: leetcode.com/u/lattelix | Codewars: codewars.com/users/lattelix

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C/C++, HTML5, CSS3/SCSS
- **Frontend Frameworks:** React 19, Next.js 15, Tailwind CSS, Redux Toolkit (RTK Query)
- **Backend & APIs:** Node.js, REST API architecture, JWT, OAuth 2.0, Axios
- **Cloud, DevOps & Tools:** Docker, Linux, Nginx, Webpack, Vite, Git, CI/CD workflows, ClawBot, AI Agents, Figma (Dev, UX/UI)

SUMMARY

Performance-driven Software Engineer with 4+ years of experience specializing in distributed web applications, API integrations, and scalable architectures. Proven track record in optimizing high-load Next.js/React ecosystems, reducing server response times, and developing AI-driven automation workflows. Combining product-oriented delivery with rigorous system engineering (C/C++, POSIX) to build fast, secure, and resilient digital infrastructure.

WORK EXPERIENCE

Royal House (Tech Product Company) | *Software Engineer* | Mar 2023 – Dec 2025

- Accelerated application Time-to-Interactive (TTI) and Largest Contentful Paint (LCP) by 40% through advanced Code Splitting, Lazy Loading, and Vite bundle optimization.
- Engineered a secure authentication and authorization architecture utilizing OAuth 2.0 (GitHub, Apple) and JWT, safeguarding data for 1000+ active enterprise users.
- Architected a dynamic internationalization (i18n) infrastructure, enabling seamless product scaling for English-speaking and global markets.
- Collaborated in an Agile environment with backend engineers and product managers, managing feature delivery and version control via GitHub.
- Translated complex Figma designs into responsive, pixel-perfect, and highly interactive UI components.
- Stack: React, TypeScript, Redux Toolkit (RTK Query), Tailwind CSS, Docker.
- Project: royal-hotel.by

Independent / B2B | *Software Engineer (Contractor)* | Jan 2020 – Dec 2022

- Designed, developed, and deployed 10+ end-to-end web applications for various clients, managing the full technical lifecycle from database schema to responsive UI.
- Refactored legacy codebases and optimized asset delivery pipelines, achieving an average 25% improvement in application load speeds across multiple client projects.
- Ensured 100% design fidelity and cross-browser compatibility using modern HTML/CSS architecture and vanilla JavaScript.

EDUCATION

Software Engineering Program (C/C++, Algorithms, System Design) | *Ecole 42 Network* | May 2023 – Present
Intensive peer-to-peer engineering curriculum focusing on low-level system programming, memory management, and POSIX architecture.

B.S. Information Systems and Technologies | *State Technical University* | 2022 – Present

Electrical Engineering Diploma | *Industrial College* | 2019 - 2023

LANGUAGES

English: Professional Working Proficiency
